Step 3

Type in the 6-digit no. (appearing on your security token) in the [Token Number](#) box. Please note that the 6-digit no. randomly changes every 60 seconds.

The screenshot shows the Asia United Bank login page. At the top, there is a red header with the bank's logo and name. Below the header, the page is titled "login" and "Token Authentication". There is a text input field labeled "Token Number:" containing the value "032848" and a "Submit" button. Below the input field, there is an image of an RSA SecurID security token. To the right of the image, there is text explaining that AUB offers an online authentication solution using a "Token" device. Below this, there is a paragraph stating that AUB has chosen RSA as the provider for this technology and provides links for more information and instructions.

login

Token Authentication

Token Number:

 AUB now offers an online authentication solution that utilizes a device known as a "Token" -- a simple yet effective tool for verifying the identity of remote users.

By employing this new and strengthened authentication technology, AUB hopes to enhance online trust from its users, by giving the guarantee of security to every transaction conducted at its websites.

To proceed with your login process, enter the six-digit number currently displayed on your token device and press the Submit button.

AUB has chosen RSA as provider for this technology. [Click here to know more about RSA.](#)

[Click here if you want more detailed instructions on using your token.](#)

Care and Use of your Security Token

Your new AUB Security token is part of a security system that protects your organization's valuable resources. For your own protection and that of the system, always take the following precautions:

1. Your security token contains delicate and sophisticated instrumentation. The token casing, LCD and silicon chip will break if exposed to harsh elements. Protect your security token from physical abuse. Do not immerse it in liquids, expose to extreme temperatures, put under pressure or try to bend it.
2. Exercise care not to lose your security token or allow it to be stolen. If your token is missing report it to us immediately by calling (02) 636-6103.
